Brain Maps Show that Specific Subtle Energy Patterns Influence Electrical Brain Activity

Brain Maps conducted in a private lab 1993

The following graph is an example of brain maps taken on 2 subjects with open eyes under the influence of the subtle energy formula “Quiet Mind”.

Correlating the pictures with the color graph on the left you can see that the beta rhythm, which is usually dominant when the eyes are open, is suppressed and theta rhythms are significantly developed. Synchronization of activity in the left and right hemispheres of the brain is also present in these pictures. This graph demonstrates that this energy formula has the ability to calm the brain and assist people in achieving a reflective or meditative state.
